

Fire – The crucial element of life

Theme

The picture of a flaming fire relates to the theme of life by signifying its importance as one of the crucial elements responsible for life. It also symbolizes how important its discovery is and has led humanity to progress as a species as its discovery facilitated the breakthrough of one invention after the other and hence, can be looked at as a sign of progress.

Before proceeding with the theme, I wanted to pursue the idea of the theme of life by signifying the 5 elements responsible for life. However, due to time and complexity constraints, I had to stick to the current collection of pictures.

Details of composition

focal length: 4.103 mm

Rule of thirds

The subject was placed in a grid 3*3 such that it suffices the rule of thirds for a good composition and lies on the 1st intersection of the grid points.

Technical Aspects

Aperture - f/1.7

ISO - 100

Shutter Speed – 1/400 sec

Post Processing Workflow

1. Cropped the Image to remove unwanted areas
2. Adjusted brightness in the raw image
3. Adjusted Contrast in the Raw image
4. Adjusted Vibrance and saturation levels to enhance colours
